

TechMart Electronics

Installation & Setup Guide

Setting Up Your TechMart Laptop

1. Press the power button to start the initial setup wizard.
2. Select your language and region.

Installing TechMart Drivers (Windows)

1. Open techmart.com/drivers in your browser.
2. Enter your laptop model number to download the correct drivers.

Common Installation Errors

- Error: Driver installation failed - Run the installer as Administrator.
- Error: Incorrect hardware ID - Check the device manager for the correct ID.

Resetting Your Device to Factory Settings

- Windows: Settings > Recovery > Reset this PC > Remove everything.
- This will erase all data on the device.

Setting Up TechMart Phone

1. Insert SIM card (nano-SIM, slot on left side).
2. Power on the device and follow the on-screen instructions.

Bluetooth Pairing

1. On your device, go to Settings > Bluetooth.
2. Enable Bluetooth and select the TechMart device to pair.
